Topics of Interest

Information Systems and their Engineering

- Requirements Engineering
- Model-Driven Engineering
- Web-Based Apps and Services
- Data-Driven Evolution
- Method Engineering

User-Oriented Approaches

- Social Computing and Social Network Analysis
- User-Centered Design
- Collaborative Computing
- Human Factors in Information Systems

Data and Information Management

- Databases and Information
- Information Search and Discovery
- Information Security and Risk Management
- Conceptual Modelling and Ontologies
- Knowledge Graphs

Reflective Research and Practice

- Responsible Research in and for the Hyper-Connected World
- Research Methodologies in Information Science
- Impact of Information on the Enterprise & Individuals
- Lifecycle Models
- Design Science and Rationale
- Action Research and Case Studies in Information Science

Submission Tracks

Main Conference Track

- Technical solution papers
- Evaluation papers
- Industrial practice and experience papers

Doctoral Consortium Workshops
